## What is Design?

Design is the aesthetics of the statements. This is where you brand, change colors, graphs and layout of the online and PDF/print statements.

**Chart Options** - are typically left enabled with the exception of the two-page print statement. On the two-page statement the pie chart under the Estimated Tax Savings section is often remove. Uncheck tick boxes to show chart or not.

**Color Options** - are the primary and secondary colors of the online and pdf/print statement.

**Date Selections** - allows you to update the header on the [PDF/print statement](#) and header of each tab on the online statement. Data as of Date displays on the Compensation page of the [online statement](#) and is part of the footer of the PDF/print statement.

**Image Selections** - allows you to configure branded images for the PDF/print statement and lets you choose whether to show or not to show the images.

**Upload Images** - allows you to add your company logo on the online and PDF/print statement and brand your compensation page with an image. To add or change logo and/or image, click on **Choose File** button.

**Statement Layout** - allows you to choose the PDF/print statement layout. Available layouts are 2-page, 4-page and online layout which is a replica of the online statement
