

Chart Options

Last Modified on 10/24/2025 1:32 pm PDT

Chart Options are typically left enabled to provide visual representation of data within the statement.

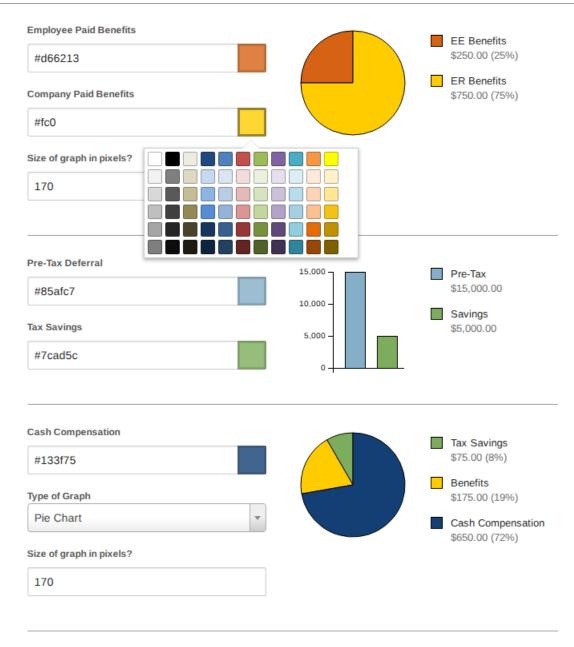

For the **two-page PDF print version**, the chart under the **Estimated Tax Savings** section is automatically removed.

☐ Customize Chart:

- 1. Go to **Design.**
- 2. Select **Chart Options** from the dropdown.
- 3. To control **chart visibility**, simply uncheck the corresponding boxes.

- 4. Enter **HTML color codes** directly in the color fields.
- 5. Or click the **color squares** to select from the palette.
- 6. Adjust graph size if necessary.

7. Modify the **number of decimal places** shown in percentage values.

Number	of	Places	after	Decimal	for	Percentages

The maximum amount of numbers after a decimal place for percentages. Numbers are rounded.

8. Changes will take effect after you click Save.

■ Note: Use brand-specific colors to maintain consistency with your organization's visual identity.
